

SLSIM is a curriculum development project aimed to improve the accessibility and quality of higher education in the field of energy efficient, smart and sustainable lighting systems at universities in Mozambique. The project is being implemented at two universities in Mozambique in cooperation with two European Universities.

SLSIM promotes education to produce experts in the field of energy efficient, smart, and sustainable lighting technologies based on the needs of labor market in the partner country Mozambique. In addition to the activities aimed to provide improved access and quality of higher education, SLSIM activities are also aimed at strengthening the role and relevance of higher education in development and society.

SLSIM belongs to the Erasmus+ programme of the European Union for the action Capacity Building in Higher Education (CBHE).

CBHE action supports international cooperation projects based on multilateral partnerships between organizations active in the field of higher education. It supports the relevance, quality, modernization and responsiveness of higher education in third countries not associated to the programme for socio-economic recovery, growth and prosperity.

Project Start: 1 November 2023

Duration: 3 years

Coordinator: Aalto University, FI

Co-funded by
the European Union

Capacity Building for
Sustainable Lighting
Solutions in Mozambique

Main Objectives

The overall objective of the SLSIM project is to support Higher Education Institutions in Mozambique to provide education that promotes sustainable socio-economic development.

The specific objectives of the project are:

- ♦ To improve the access to education in the field of sustainable lighting systems
- ♦ To improve pedagogical expertise and teaching infrastructure for high quality education and learning
- ♦ To strengthen the cooperation between university, industry, public sectors and society for the promotion of sustainable lighting
